This report was prepared by the Mobile Crisis Intervention Services Performance Improvement Center (PIC):

Kayla Theriault, MPH, Data Analyst; Aleece Kelly, MPP, Senior Data Analyst; Yecenia Casiano, MS, Project Coordinator; Kellie Randall, Ph.D., Director; Carrie Shaw, Administrative Assistant; Heather Clinger, MPH, CPS, Program Manager (Wheeler Clinic); Sarah Camerota, LICSW, 2-1-1 EMPS Program Manager (United Way of CT-2-1-1); Jeffrey Vanderploeg, Ph.D., CEO

The Mobile Crisis Intervention Services Performance Improvement Center is housed at the
Child Health and Development Institute of Connecticut, Inc.

Executive Summary

Additional data and appendices are available online <http://www.chdi.org/publications/> or contact Jeffrey Vanderploeg, PhD, jvanderploeg@uchc.edu for more information.

Note: Due to COVID-19, schools were closed and stay-at-home orders were put in place for the non-essential workforce in Connecticut beginning in mid-March of 2020. While many schools and businesses have now re-opened (with restrictions), the effects of COVID-19 are still being felt significantly. Mobile Crisis is still operational, and as part of the essential workforce providers are working with families to respond to calls via telephone, video conferencing, and in-person responses with safety of the child, family, and clinicians as the top priority. Note that both video and in-person responses during this period may be reflected within the report as 'mobile' responses. Difficulties related to the effects of COVID-19 in both service provision and data collection should be taken into consideration when reviewing this report.

Call and Episode Volume: In June 2021, 2-1-1 and Mobile Crisis received 1,047 calls including 781 calls (74.6%) handled by Mobile Crisis providers and 266 calls (25.4%) handled by 2-1-1 only (e.g., calls for other information or resources, calls transferred to 9-1-1). This month showed a 51.7% increase in call volume from June 2020 (n=690). Note that June 2020 was during the time most significantly impacted by the COVID-19 pandemic and widespread school closures.

Among the **781 episodes of care** this month, episode volume ranged from 88 episodes (Eastern) to 232 episodes (Hartford). The statewide average service reach per 1,000 children this month was 1.0, with service area rates ranging from 0.7 (Southwestern) to 1.6 (Hartford) relative to their specific child populations. Additionally, the number of episodes generated relative to the number of children in poverty in each service area yielded a statewide average poverty service reach rate of 1.9 per 1,000 children in poverty, with service area rates ranging from 1.2 (Southwestern) to 3.0 (Hartford).

Mobility: Statewide mobility was **93.5% this month**; higher than the rate in June 2020 (78.4%). Five of the six service areas were at or above the 90% benchmark this month, with performance ranging from 79.4% (Eastern) to 100.0% (Southwestern). Mobility for individual providers ranged from 78.3% (UCFS: NE) to 100.0% (CHR: Middlesex; CFGC: all sites; Wellmore: Torrington). Ten of the fourteen individual providers had mobility rates above the 90% benchmark.

NOTE: Beginning with FY21 Q2 reporting, there has been a change in calculation of mobility. If a referral made by a caller other than self/family (e.g. schools, EDs, etc.) is designated by 2-1-1 as mobile or deferred mobile, but is later determined to be non-mobile due to the family declining or not being available after multiple attempts to contact them, the episode will no longer be included in the mobility rate, as these situations are out of the providers' control. Any mobility rates from prior quarters referenced in this report have been recalculated to allow for accurate comparison.

Response Time: Statewide, this month **90.1% of mobile episodes received a face-to-face response in 45 minutes or less**, which is higher than the rate in June 2020 (70.9%). All six service areas were at or above the benchmark of 80% of mobile responses provided in 45 minutes or less, with performance ranging from 85.7% (Western) to 97.5% (New Haven). Thirteen of the fourteen sites met the 80% benchmark. The statewide median mobile response time was 30.0 minutes.

Length of Stay (LOS): Statewide, among discharged episodes, **16 of the 396 plus stabilization follow-up episodes exceeded 45 days**. The statewide median LOS for episodes discharged this month with a crisis response of *plus stabilization follow-up* was 20.0 days. The regional median LOS ranged from 17.0 days (Hartford, Western) to 43.0 days (New Haven).

Section V: Length of Stay (LOS)

Table 1. LOS for Discharged Episodes* with a Crisis Response Plus Stabilization Follow-up

	Discharged Episodes with a Crisis Response of Plus Stabilization Follow-up			
	Number of Episodes	Mean LOS (in days)	Median LOS (in days)	Percent Exceeding 45 Days
STATEWIDE	396	22.3	20.0	4.0% (n = 16)
Central	115	24.2	21.0	8.7% (n = 10)
Eastern	15	24.0	23.0	0.0% (n = 0)
Hartford	142	19.6	17.0	0.7% (n = 1)
New Haven	7	61.3	43.0	42.9% (n = 3)
Southwestern	23	29.8	35.0	0.0% (n = 0)
Western	94	18.9	17.5	2.1% (n = 2)

*Only episodes that had both a start and a discharge date within FY2021 are included in this chart.
