This report was prepared by the Mobile Crisis Intervention Services Performance Improvement Center (PIC):
Kagnica Seng, MA, Data Analyst; Kayla Theriault, MPH, Senior Data Analyst; Yecenia Casiano, MS, Senior
Project Coordinator; Kellie Randall, Ph.D., Director; Heather Clinger, MPH, CPS, Program Manager (Wheeler
Clinic); Sarah Camerota, LICSW, 2-1-1 MCIS Program Manager (United Way of CT-2-1-1); Jeffrey Vanderploeg,
Ph.D., CEO

The Mobile Crisis Intervention Services Performance Improvement Center is housed at the
Child Health and Development Institute of Connecticut, Inc.
Executive Summary

Note: Due to COVID-19, schools were closed and stay-at-home orders were put in place for the non-essential workforce in Connecticut beginning in mid-March of 2020. While many schools and businesses have now re-opened (with restrictions), the effects of COVID-19 are still being felt significantly. Mobile Crisis is still operational, and as part of the essential workforce providers are working with families to respond to calls via telephone, video conferencing, and in-person responses with safety of the child, family, and clinicians as the top priority. Possible difficulties related to the effects of COVID-19 in both service provision and data collection should be taken into consideration when reviewing this report.

Call and Episode Volume: In January 2022, 2-1-1 and Mobile Crisis received 1,298 calls including 997 calls (76.8%) handled by Mobile Crisis providers and 301 calls (23.2%) handled by 2-1-1 only (e.g., calls for other information or resources, calls transferred to 9-1-1). This month showed a 24.3% increase in call volume from January 2021 (n=1,044). Call volume is also 36.6% lower than the same month in 2020 (n=2,046), prior to the start of the pandemic.

Among the 997 episodes of care this month, episode volume ranged from 131 episodes (Southwestern) to 249 episodes (Hartford). The statewide average service reach per 1,000 children this month was 1.4, with service area rates ranging from 0.8 (Southwestern) to 1.9 (Eastern) relative to their specific child populations. Additionally, the number of episodes generated relative to the number of children in poverty in each service area yielded a statewide average poverty service reach rate of 2.5 per 1,000 children in poverty, with service area rates ranging from 1.5 (Western) to 4.5 (Central).

Mobility: Statewide mobility was 89.0% this month; lower than the rate in January 2021 (96.1%). Two service areas were at or above the 90% benchmark this month, with performance ranging from 85.1% (Central) to 95.5% (Western). Mobility for individual providers ranged from 70.6% (CFGC: South) to 100.0% (Well: Torrington). Eight of the fourteen individual providers had mobility rates above the 90% benchmark. Since the beginning of the COVID-19 pandemic, both video telehealth and in-person responses are reflected within the report as “mobile” responses. Beginning in FY2022, the number of video telehealth episodes can be found in Figure 9. Due to staffing and other challenges, there was a significant increase in telehealth responses this month (82, compared to 16 in December 2021).

NOTE: Beginning with FY21 Q2 reporting, there was a change in calculation of mobility. If a referral made by a caller other than self/family (e.g. schools, EDs, etc.) is designated by 2-1-1 as mobile or deferred mobile, but is later determined to be non-mobile due to the family declining or not being available after multiple attempts to contact them, the episode will no longer be included in the mobility rate, as these situations are out of the providers’ control. Any mobility rates from prior quarters referenced in this report have been recalculated to allow for accurate comparison.

Response Time: Statewide, this month 79.5% of mobile episodes received a face-to-face response in 45 minutes or less, which is lower than the rate in January 2021 (86.9%). While video telehealth responses are counted as “mobile” responses, they are excluded from the response time calculations in this report. Three of the six service areas were at or above the benchmark of 80% of mobile responses provided in 45 minutes or less, with performance ranging from 68.8% (Hartford) to 91.7% (Southwestern). Six of the fourteen sites met the 80% benchmark. The statewide median mobile response time was 32.0 minutes.

Length of Stay (LOS): Statewide, among discharged episodes, 60 of the 270 plus stabilization follow-up episodes exceeded 45 days. The statewide median LOS for episodes discharged this month with a crisis response of plus stabilization follow-up was 27.0 days. The regional median LOS ranged from 18.0 days (Eastern and Western) to 40.5 days (Central). Note: these calculations only include episodes that began during FY2022.

Additional data and appendices are available online http://www.chdi.org/publications/ or contact Kayla Theriault, MPH, ktheriault@uchc.edu for more information.
Section I: Mobile Crisis Statewide/Service Area Dashboard

**Figure 1. Total Call Volume by Call Type**

- 2-1-1 Only: 301
- 2-1-1-EMPS: 994
- Registered Call: 3
- Total: 1298

**Figure 2. Mobile Crisis Episodes by Service Area**

- Central: 171
- Eastern: 149
- Harford: 242
- New Haven: 131
- Southwestern: 125
- Western: 137

(Total: 997)

*After Hours Calls that resulted in episodes

**Figure 3. Number Served Per 1,000 Children**

- Central: 1.6
- Eastern: 1.9
- Hartford: 1.7
- New Haven: 1.3
- Southwestern: 0.8
- Western: 1.1
- Statewide: 1.4

**Figure 4. Number Served per 1,000 Children in Poverty**

- Central: 4.5
- Eastern: 3.5
- Hartford: 3.3
- New Haven: 1.9
- Southwestern: 1.8
- Western: 1.5
- Statewide: 2.5

**Figure 5. Mobile Response* by Service Area**

- Central (121): 85.1%
- Eastern (110): 90.0%
- Hartford (186): 88.7%
- New Haven (99): 88.9%
- Southwestern (95): 86.3%
- Western (110): 95.5%
- Statewide (721): 89.0%

*Mobility calculation updated – see exec. summary
Note: Counts of 211-recommended mobile episodes are in parentheses.

**Figure 6. Mobile Episodes with a Response Time Under 45 Minutes**

- Central (57): 89.1%
- Eastern (58): 85.3%
- Hartford (75): 68.8%
- New Haven (44): 74.6%
- Southwestern (44): 91.7%
- Western (51): 77.3%
- Statewide (529): 79.5%

Note: Counts of mobile episodes under 45 mins. are in parentheses.
Section II: Mobile Crisis Response

Figure 7. Statewide 2-1-1 Call Disposition

*This month had a higher number than usual of '211 Only' calls coded as 'EMPS Response'

Figure 8. Mobile Crisis Episodes by Provider

*After Hours Calls that resulted in episodes

Figure 9. Actual Initial Mobile Crisis Response* by Provider

*Statewide, there were 82 mobile or deferred mobile episodes that were performed via video telehealth.
