**This report was prepared by the Mobile Crisis Intervention Services Performance Improvement Center (PIC):**

Teniola Akinosho, MPH, Data Analyst; Kayla Theriault, MPH, Senior Associate; Yecenia Casiano, MS, Senior Project Coordinator; Kellie Randall, Ph.D., Associate Vice President of Quality Improvement; Heather Clinger, MPH, CPS, Program Manager (Wheeler Clinic); Eliana Colón, 2-1-1 Services Manager; Ronette Daniels, Director of 2-1-1 Services (United Way of CT-2-1-1); Jeffrey Vanderploeg, Ph.D., CEO

The Mobile Crisis Intervention Services Performance Improvement Center is housed at the

## Executive Summary

**Note:** As of January 2023, Mobile Crisis providers are available for a mobile response 24 hours a day, 7 days a week. Prior to January 2023, a mobile response was only available Monday – Friday 6:00 AM to 10:00 PM and from 1:00 PM to 10:00 PM on weekends. Unless stated otherwise, the data in this report reflects calls during all 24 hours. Select charts continue to break out data by old and new hours to highlight any differences during the expanded hours.

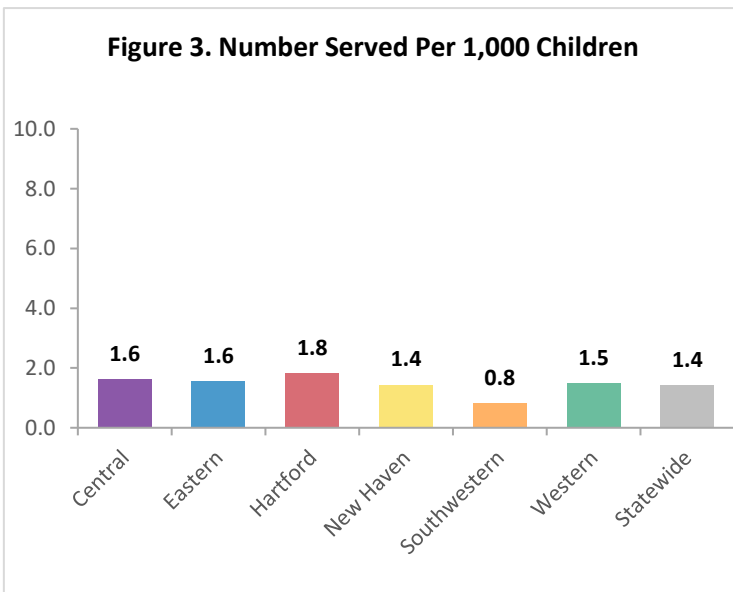

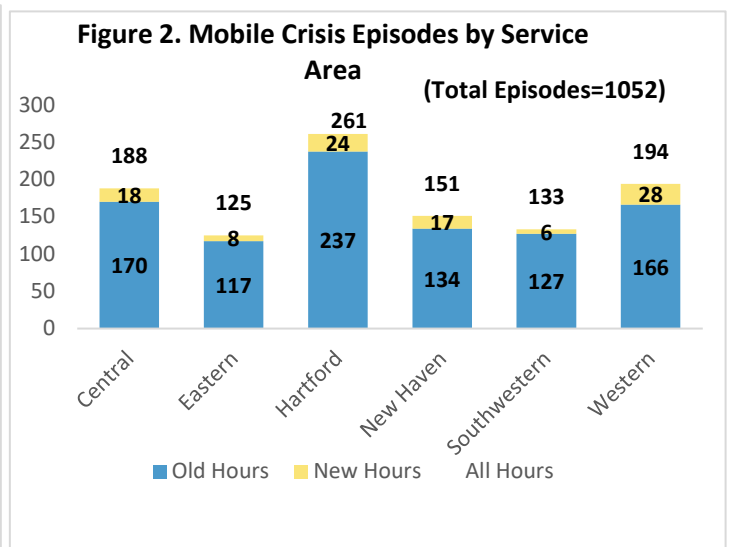

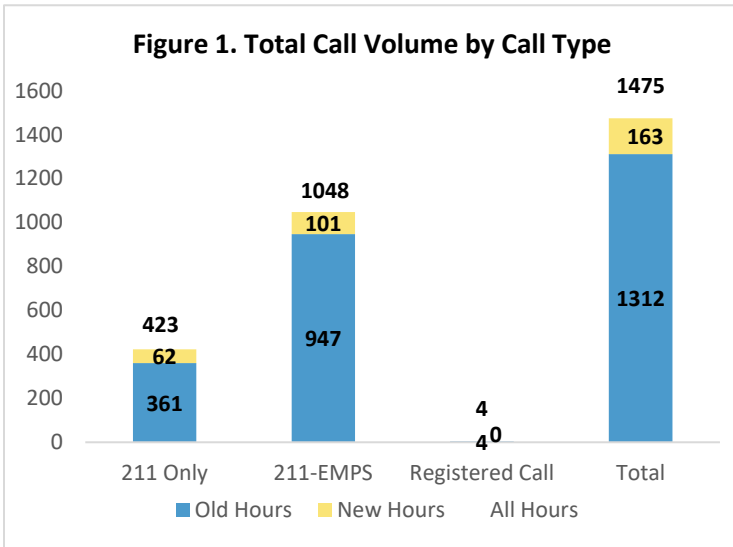

**Call and Episode Volume:** In April 2026, 2-1-1 and Mobile Crisis received 1,475 calls including 1,052 (71.3%) handled by Mobile Crisis providers and 423 calls (28.7%) handled by 2-1-1 only (e.g., calls for other information or resources, calls transferred to 9-1-1). This month showed a 6.5% increase in call volume from April 2025 (n=1,385) and 0.2% increase in episode volume (1,050 episodes in April 2025). Of the total calls and episodes, Mobile Crisis and 2-1-1 received 163 calls during the expanded overnight and weekend hours. This included 101 (62.0%) calls handled by Mobile Crisis providers and 62 (38.0%) calls handled by 2-1-1 only. The overnight and weekend call volume in April 2026 was lower than last month (170) and higher than April 2025 (117).

Among the **1,052 episodes of care** this month, episode volume ranged from 125 episodes (Eastern) to 261 episodes (Hartford). The statewide average service reach rate per 1,000 children this month was 1.4 with service area rates ranging from 0.8 (Southwestern) to 1.8 (Hartford) relative to their specific child populations. Additionally, the number of episodes generated relative to the number of children in poverty in each service area yielded a statewide average poverty service reach rate of 3.0 per 1,000 children in poverty, with service area rates ranging from 1.2 (Southwestern) to 7.2 (Central). During the expanded overnight and weekend hours, there were 101 episodes of care with volume ranging from 6 episodes (Southwestern) to 28 episodes (Western). The number of overnight and weekend episodes in April 2026 was higher than last month (97, March 2026).

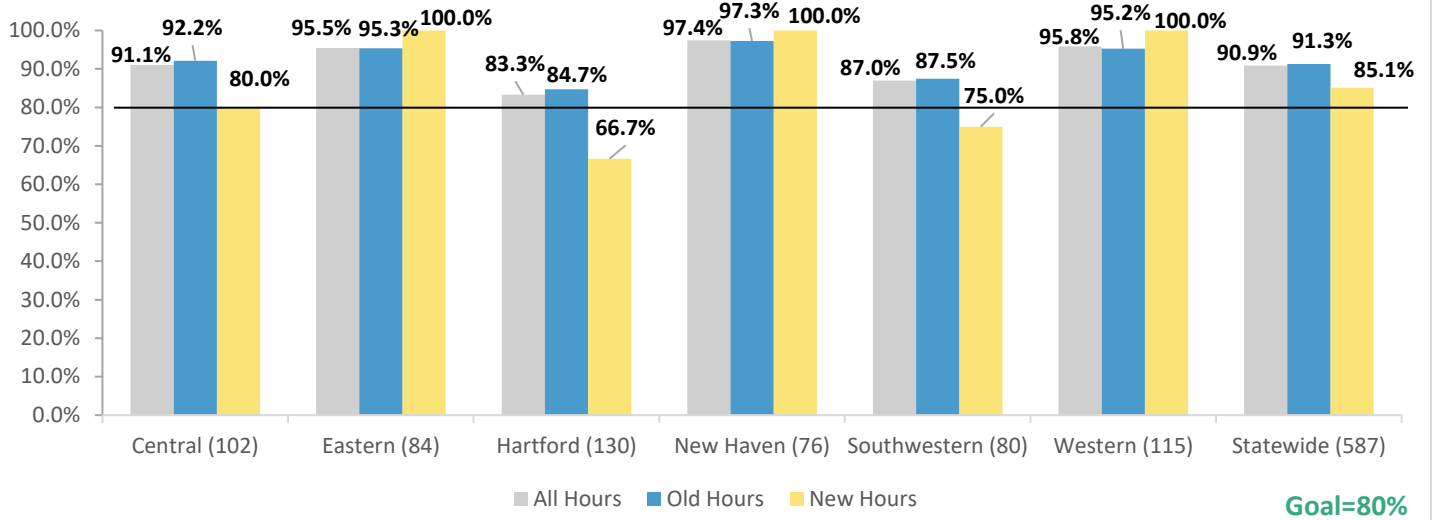

**Mobility: Statewide mobility was 96.8% this month**, which is similar to the rate in April 2025 (95.9%). All six areas surpassed the 90% benchmark this month, with performance ranging from 94.2% (Eastern) to 98.2% (Western). Mobility for individual providers ranged from 93.9% (UCFS: NE) to 100% (Wellmore: Torrington). All fourteen individual providers met or exceeded the 90% mobility rate benchmark. The statewide mobility rate during the new hours was 89.5%, with four of the six regions exceeding the 90% benchmark. Performance ranged from 50.0% (Eastern) to 100% (Southwestern). The mobility rate during the traditional Mobile Crisis hours was 97.5%, similar to the overall rate of 96.8%. During the new hours, 45.5% of episodes requested a mobile response, 33.7% requested a deferred mobile response, and 20.8% requested a non-mobile response; in the traditional hours, 67.1% of episodes requested a mobile response, 24.1% requested a deferred mobile response, and 8.9% requested a non-mobile response. As seen in the mobility rate, the vast majority of callers requesting a mobile or deferred mobile response receive it.

**Response Time:** Statewide, this month **90.9% of mobile episodes received a face-to-face response in 45 minutes or less**, which is similar the rate in April 2025 (91.0%). All the six service areas were above the benchmark of 80% of mobile responses provided in 45 minutes or less, with performance ranging from 83.3% (Hartford) to 97.4% (New Haven). All fourteen sites met the 80% benchmark. The statewide median mobile response time was 30.0 minutes. The rate of episodes meeting response time during the traditional hours (91.3%) was similar to the overall rate of 90.9%. During the expanded hours 85.1% of mobile episodes received a response within 45 minutes, with performance ranging from 66.7% (Hartford) to 100% (Eastern, New Haven and Western). When looking at these rates, it is important to keep in mind that the number of overnight episodes is very low, and the number receiving a Mobile response is even lower.
